# Nestbox pack

## 01 Main Frame

A module with a sliding and locking mechanism. Designed to house the cooker module, water module, and a fridge.

## 02 Cooker Module

Includes two neoprene-covered gas cartridges and two burners. The aluminium base is portable and has one high drawer for kitchen equipment, one wide drawer for camping utensils, and a bag for small things like spice.

## 03 Water Module

Includes a folding washbasin without drain, two twelve-liter plastic water canisters with a suction pump, one plastic storage drawer and a 150 cm long shower hose or a wash basin mixer. It is controlled by a tap.

## 04 Nestbag – Ceiling Bag

This ceiling bag and screen significantly expand your storage space.

## 05 Nestbags – Window bags

Window bags are designed for the rear window of your car. The size of the bag can be adjusted to fit any rear window.

## 06 Hose for the Water module

Thanks to this quick-coupling hose, you can draw water from external sources.

## 07 Camping shovel

## 08 Camping axe

## 09 Cooling bag

This cooling bag provides a cooling element to keep your food cold.

## 10 Nestpillow

## 11 Nestmattress

Is a folding mattress made of layered foam composite with anti-slip material on the underside.

## 12 Folding Bed Frame

This fold out bed accommodates two adults. The bed frame can be easily detached from the main frame..

## 13 Universal bed grate support

This set will provide support the bed base without the need to attach it to the seats.

## 14 Folding Table

The table consists of a base frame, a removable table, and two chairs.

# Nestbox and accessories

## Nestbox

An installation that quickly converts your car into a comfortable camper just in few minutes. Designed for easy storage in your trunk, it consists of a main frame with two small drawers, and space for cookers, water, a fridge, and textile bags. We offer three sizes: medium, large and off-road. Whatever your needs, Nestbox is the perfect travel companion. Nestbox pack is made in Czech Republic.

## Cooker Module

Prepare your breakfast or morning coffee on the stove or simply take the gas cartridge with burner on your trip. Full set includes two gas cartridges and two burners. The aluminium base is portable and has one high drawer for kitchen equipment and one wide drawer for camping utensils. It also includes pieces of sheet metal for windproofing that are housed in a practical case.

## Water Module

Feel at home wherever you are. The Water Module contains a foldable sink without drain, two 12 l plastic tanks with water suction pump, a plastic drawer, a hygiene kit and a 150 cm long shower hose with integrated quick coupling for easy filling. The water is controlled by a tap.

## Nestmattress

When designing the mattress, we knew it had to meet several basic requirements, that is – being space-saving, lightweight, temperature and UV resistant and easy to maintain. That's how Nestmattress was developed, a mattress that was made specifically for sleeping in a car, a mattress, that is thin but at the same time comfortable. It consists of different layers, the filling is basically a sandwich made of two PUR foams covered with sheep's fleece and high-quality outdoor fabric. Bottom side is covered with anti-slip washable material that helps the mattress to stay on the bed ribs. Or you can just put it on the grass. You can easily fold the mattress and place it on the top of the Nestbox.

# Nestpillow

There is never enough space in the car and even the smallest one counts. That's the reason why we had the pillows tailored with special pockets to fill them up with what you can't miss while you sleep or rest. The Mystic plush is low-maintenance material, the same as we used for mattresses covers. Nestpillow and Nestmattress together are making more than just a place to sleep.

# Nestbag window bag

Nestbag window bags are designed for the rear window of your car. Made entirely of Batyline mesh, they can be adjusted to fit any rear window.

# Nestbag ceiling bag

Nestbag ceiling bags allow for maximum space efficiency when you're on the go. They are made entirely of outdoor Batyline mesh – a solid, light, and breathable material that is easy to maintain. They are also available in several colour schemes.

# Cooling bag

This cooling bag provides a cooling element to keep your food cold. Extends the range of accessories with a comfort element to keep your food cold. The bag size fully utilises its assigned space within the Nestbox. Thermally insulating materials and inner pockets designed for insertion of cooling inserts or cooling gel bags provide the necessary temperature in the bag. The bag can also be used for food shopping shortly before a trip. You can keep a shopping list in the transparent pocket on the bag flap and a pen for notes in the Batyline handle. 20 litres is plenty of storage space for all your outdoor activities.

# Universal bed grate support

This set will provide support the bed base without the need to attach it to the seats. A bag for safe storage of the whole set is available.

# Hose for the Water module

You no longer need to be dependent just on water from the canister. Thanks to this quick-coupling hose, you can draw water from external sources. The hose contains a filter thus filtering water of water impurities and allowing you to drink water from any source and is also suitable for drinking water from the tap.

# Camping shovel

A great helper, useful in countless outdoor activities, even the unplanned ones. It can also be attached to your Nestbox.

# Camping axe

This practical axe is an indispensable helper when camping. It is specially designed for outdoor use. The compact size makes it easy to carry in your backpack or belt. You can also attach the axe to your Nestbox using a stainless-steel clip.
