

EGOĒ

Ideas

EGOE

The idea is only the beginning.
For the implementation
to succeed, a long team effort
is needed. Development,
production, marketing, sales.
These are all parts of our journey.
We believe that ideas make
products..

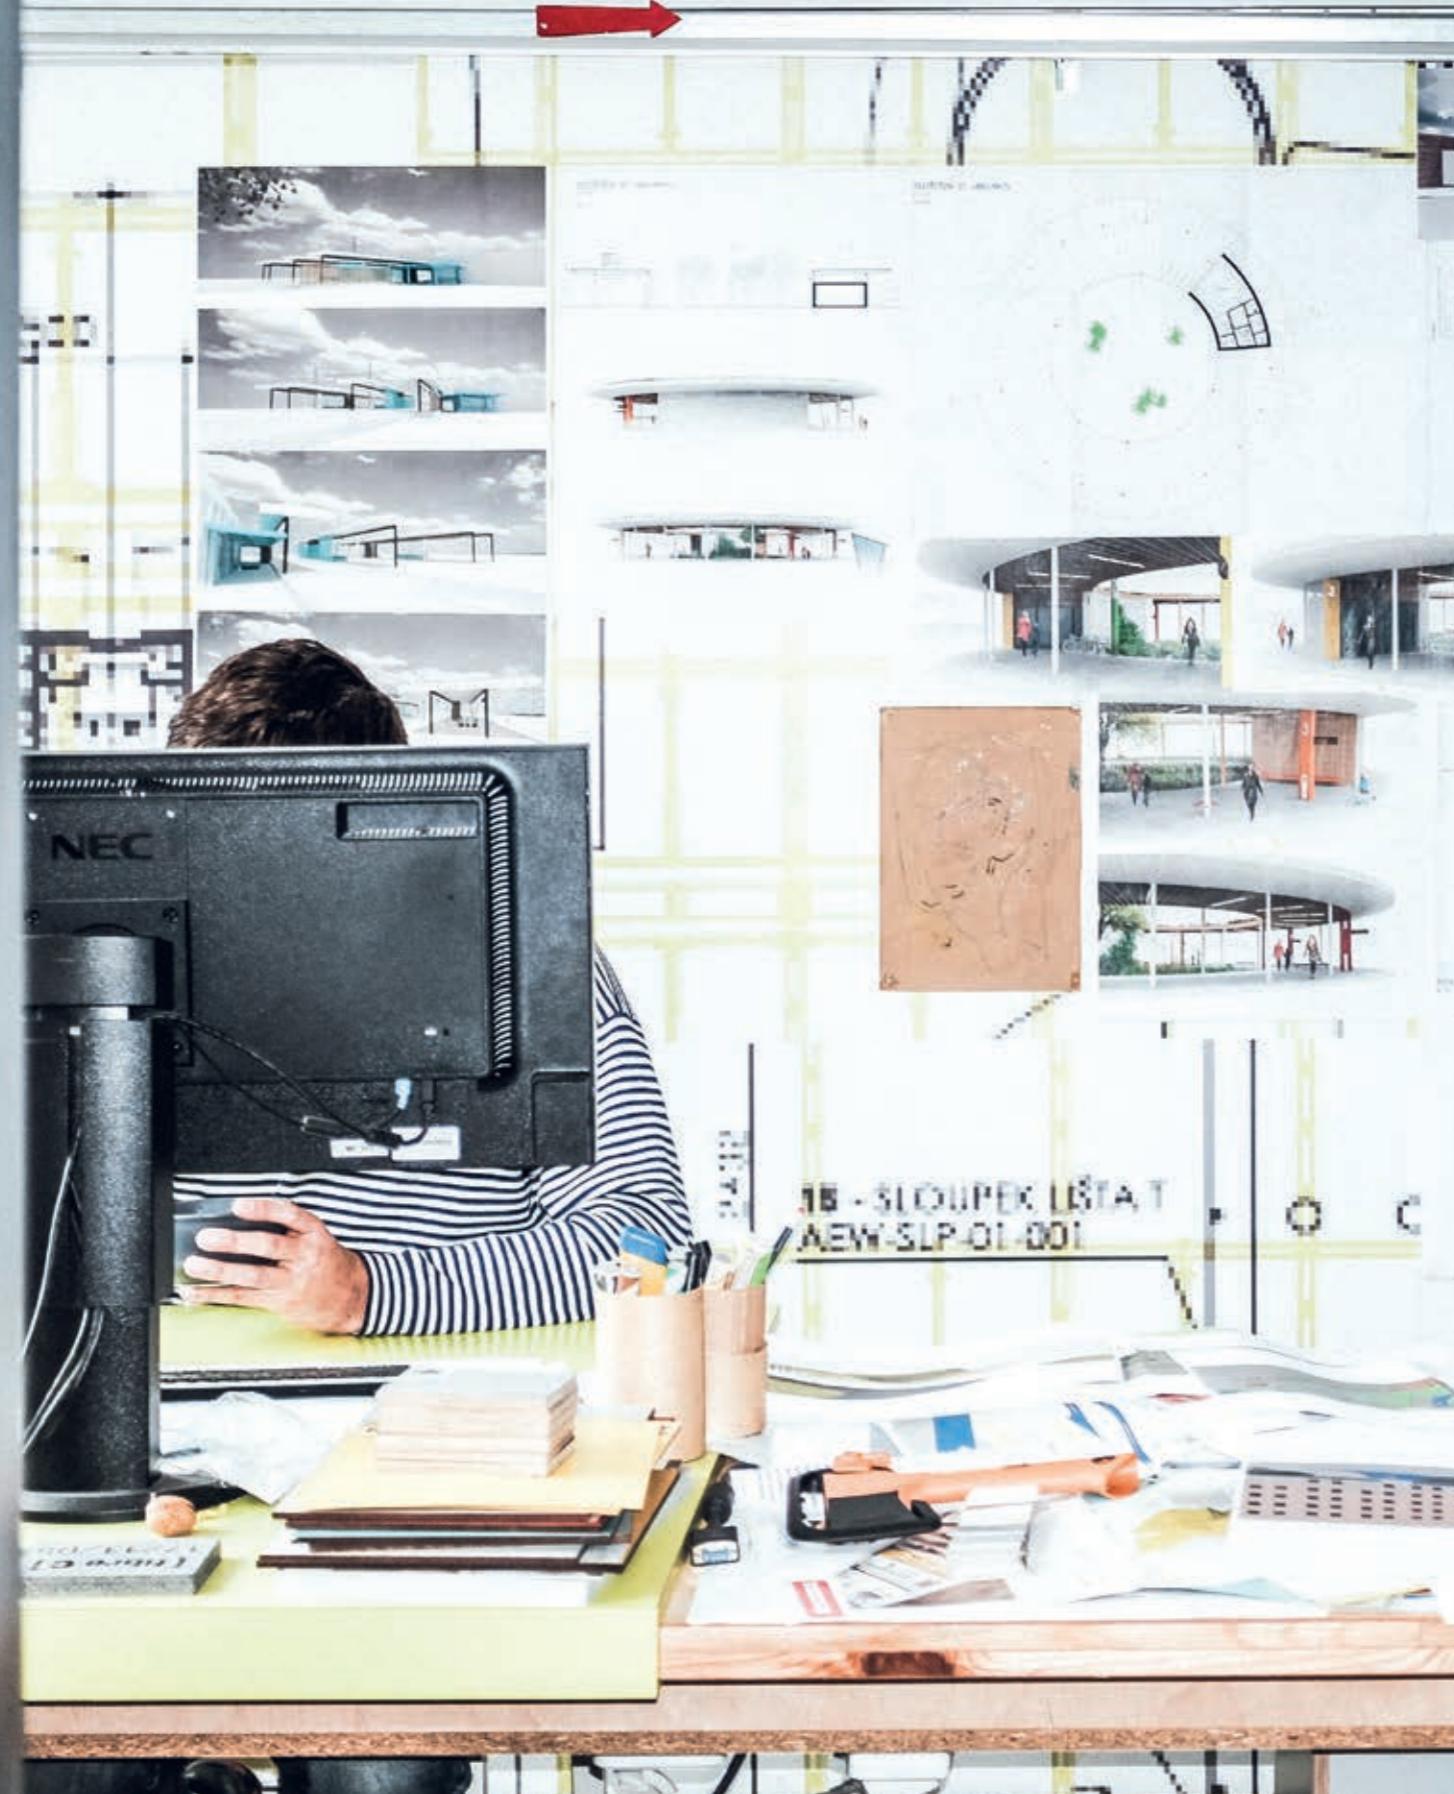

Make

Products

Ideas Make Products

The inner craving to solve a problem. Not to copy others, not to follow trends but instead to offer our own perspective. That is the idea. We perceive design as the manifestation of a concrete solution.

Ideas Make Products

To accept responsibility for the implementation. This is the most important precondition for an idea not to end up merely on paper or in our head. That is why we produce ideas ourselves in the first place.

Ideas Make Products

Be it furniture or railway stations, the final product must be the transformation of vision into something tangible, its materialization. The final product must not serve its own purposes but respect the context. It speaks for its creators.

Production area

The premises of Egoé at Bílovice 519. The place where our ideas are born and products created. Comprehensive facilities for everything our team of 340 employees do. Here we are at home.

Sustainability

We prefer renewable sources, use heat recovery ventilation, retain water. We do not see leftovers as waste but an opportunity to create other products. We strive not to burden the environment, not to produce at the costs of nature.

Communication

To show what, how and where we do it. This was the reason why we started our WiFič VEN! outdoor festival. In addition, we publish our own Magazín 519 where we explain why we keep beating our own paths.

Harvests of Design

100% functionality and adequate aesthetics. This is what quality industrial design looks like. The exhibition Harvests of Design aims to highlight its importance, analyse the current situation and show good examples.
