Module

Cooker

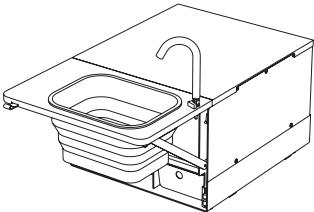

Module Cooker contains: Two cookers, two neoprene-covered gas cartridges, one high drawer for kitchen equipment, one wide drawer for camping utensils, and a bag for small things like spice. It also includes pieces of sheet metal for windproofing that are housed in a practical case.

720 EUR
excluding VAT

Module

Water

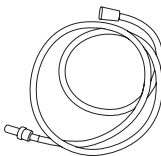

The **water module** is part of the kitchen set and can be used to prepare food or for basic hygiene. The module can be simply inserted into the corpus of the Nestbox car assembly. The module consists of an aluminum structure with stainless steel parts and birch plywood covered with HPL surface. It also includes a folding washbasin without drain, two twelve-liter plastic water canisters with a suction pump, one plastic storage drawer and a 150 cm long shower hose or a wash basin mixer, either of which can be mounted on a quick coupling. It is controlled by a tap.

1.160 EUR
excluding VAT

Hose for the

Water module

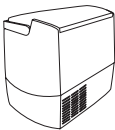

Thanks to this quick-coupling hose, you can draw water from external sources. The hose contains a filter thus filtering water of water impurities and allowing you to drink water from any source and is also suitable for drinking water from the tap.

23 EUR
excluding VAT

Refrigerators

Refrigerator Dometic CTX21, 21L, absorption, **for NST700 and NST710**
